# Coding

## Video Game Design with Phaser

Start programming games like a professional with this course. Using the popular desktop and mobile gaming framework, PhaserJS, students will learn how to create a platformer game, a side-scroller game and mini-games. By engaging their creativity and design thinking skills, they will create, customize and enhance their games by adding their own set of characters, environments, gravity and world physics. Using Design Thinking methodology, students will gather feedback from classmates and iterate to improve their games.

## Build your Tech Startup

For aspiring technologists, this start-up course teaches students about cutting edge technologies to help them innovate a fresh new tech startup idea. Starting with fundamentals of technology, students will learn how programming works using HTML, CSS and JavaScript. Following this, students will identify a real-world problem that they would like to solve. Through design thinking activities and their newly acquired coding skills, they will design and prototype a working tech solution. Working independently or in small teams, students will then develop a business plan, company brand, and digital online presence. At the end of the course, students will have created a tech prototype, a business plan presented as a website and a business blog.

## **Voice Acting & Sound Effects: Holiday Edition (Levels 1-2)**

Wondering how the voices and sounds are created for animated movie characters? Many students have seen animations from Disney, Pixar, and Dreamworks before, but few can claim to have made their own voices and sounds for them. In this Easter camp, students will learn to bring comedic animated characters to life using their own voices and sounds. They will create new versions of an animated movie scene using their voices and sound effects; learn how to record and edit voice performances and sound effects; understand how filmmakers use voices and sounds to create comedic moments; feel entertained by hearing their own voices and sounds in a professional movie.

## Multi Activity

### Multi Activity Level 1 (Ages 5-8) - Stormy Chefs & ArtCrafters!

Not only will you be COOKING UP A STORM, you will also be CREATING SOME AWESOME ARTPIECES!! This Easter Holiday, our Stormy Chefs will learn to make lots of delicious appetizers, entrees and desserts! After each lesson, they will be proud to bring home something yummy! (Students are required to bring lunch boxes or food containers to take food home) Festive recipes include Easter Bunny Pot and Happy Bunny Cupcakes. In ArtCrafters we believe that unlocking a child's creativity for longer-term growth is best met with multisensory activities and experimentation. Technique, craft and design are integral parts of the program. **\*notify the provider about any known food allergies**

### Multi Activity Level 2 (Ages 9-12) - Extreme Sports Science (ESS)

This dynamic combination of Science Adventures and RoboCode will not only make students understand important science concepts (motion and force), but also develop logical thinking and basic coding skill-sets. In this exciting Extreme Sports Camp, students will explore both the physical and the digital world of sciences. They will build cool dragsters, throw magnetic darts, hurtle parachutes through the air and learn about gravity. These budding physicists will build different kinds of simple machines and learn how they work. At the same time and consistent to the ESS theme, students will create two video games relating to Sports – one using darts and another shooting basketball. Students will have a blast in this ESS Camp!
